Entrance Directional Sign	Door Control Module
Dually Wheel Treadle Adapter	Door Control Photo Eyes
Triple Foam Applicator	Rain Arch
Sealer Wax Applicator	Undercarriage Washer
Drying Agent Applicator	Wheel Stinger
Pager Modern Module	Dryers

What Our Customers Are Saying:

"I consider myself a customer advocate, and wanted to provide not only a cleaner vehicle than I had been, but wanted to improve my customer's experience with an attractive, open, and airy car wash. When I saw the FreeStyler, I felt it matched up much better than other machines with what I was going for in my business model. The FreeStyler gives me an unobstructed view through the bay with a very sexy look, that achieves what I was going for."
— Geoffrey Shure, Ameriwash, Alsip, IL

"The FreeStyler's wonderful! The machine operates more smoothly than any other friction in-bay automatic we've used in the past. The onboard controls make on the fly machine adjustments possible without shutting down my wash. But what I like most of all is the FreeStyler's programming flexibility. I can easily select, slow down, or speed up any of the functions. And it (the FreeStyler) does duallys, which will build a large niche market for the wash in my area."
— Mark DiTomasso, 24 Hour Automatic, Stafford, CT

Free to Pick Your Style!

FreeStyler®

Gone are the days of claustrophobic floor-mounted rollovers...

Introducing Belanger's new FreeStyler®, the most advanced friction in-bay automatic available in the industry. Every aspect of the FreeStyler was carefully designed to deliver the most comprehensive combination of performance features in the market. From its open & inviting overhead gantry design to its uniquely concealed onboard controls, the FreeStyler is designed to deliver the highest level of user-friendly functionality and operational simplicity... all in one highly attractive machine!

"The FreeStyler, our newest addition to the friction in-bay automatic product category, delivers unprecedented design innovations that introduce many ground-breaking features and benefits to customers worldwide," says Patrick Kelsey, VP of Sales and Marketing for Belanger, Inc. "With its open ClearBay design, the FreeStyler eliminates the claustrophobic experience of traditional rollovers and enhances the customer's overall washing experience. The overhead rail and carriage design delivers greater system reliability and smoother operation than traditional floor-mounted systems. This innovative design removes the drive components from the dirt, water, and chemical exposure and eliminates potential ice build up on the tracks. With its optional machine and Neo-Tex colors, combined with custom decaling, you are free to pick your style in order to customize the look & message of your car wash."

The onboard Wheel Stinger delivers high volumes of medium-pressure water for optimal cleaning results.

Patented counterweight top wheel design provides breakaway forgiveness, eliminating potential damage to vehicles commonly associated with guillotine-style wheels.

Floating wheel and carriage drive motor/gearbox assemblies minimize bearing loads, which significantly extends component life.

Dual stage back-to-back arm cylinder uses air-over-oil controls to deliver precise wheel movement for superior wash results.

Easy to reach onboard carriage controls provide fast and easy, finger-tip adjustments of equipment.

Concentric hub & phasing design provides better wheel balance and reduces overall service costs.

Dual directional rear side wheels minimize vehicle damage & promote better cleaning.

ClearBay™, an open and inviting bay appearance, is made possible through the FreeStyler's signature overhead rail design, which ensures smoother vehicle processing.

➤ The FreeStyler's branding flexibility enables operators to customize the look & message of their wash facilities.

➤ Overhead rail design eliminates dirt and ice related maintenance, while ensuring rapid precision movement and increased throughput.

➤ The Wheel Stinger® is equipped with 15 strategically positioned high impact nozzles to deliver extraordinary cleaning performance. — Patent pending.

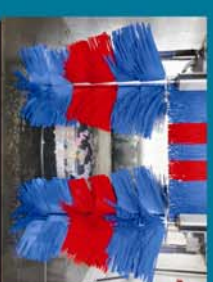

➤ Triple Foam pods deliver rich fabulous foam onto any vehicle with minimal waste.

➤ Dual stage back-to-back cylinder operates using air-over-oil controls to deliver smooth entrance wheel movement, in combination with air only for increased oscillation speed.

➤ Unlike other friction in-bay automatics, the FreeStyler comes standard with extra tall exit wheels to ensure excellent cleaning coverage for today's larger vehicles.

➤ In-bay equipment room allows for easy retrofitting of existing wash bays and minimizes construction costs.

➤ Uniquely concealed onboard controls are conveniently accessible for fast and easy maintenance.
